HONORS

Prof. *Martin Quack*, Laboratory of Physical Chemistry, ETHZ, received a honorary doctoral degree from the Faculty of Chemistry of the Georg-August-University in Göttingen, Germany. He was honored for his contributions to the understanding of the principles of chirality and symmetry in molecular processes.

CONFERENCES/WORKSHOPS/SYMPOSIA

Theory & Modeling at the Chemistry-Biology Interface

April 30 to May 6, 2009, 10.00–13.00

Institute of Organic Chemistry, University of Zurich

This five-day course will be presented by Prof. David Beratan, Duke University, Durham, USA.

Practical Kinetics

7–12 May, 2009, 10.00–13.00

Institute of Organic Chemistry, University of Zurich

This four-day course will be presented by Prof. Charles I. Perrin, University of California at San Diego UCSD, USA.

Festival science et cité – Basecamp 09

Biotreibstoffe: Energie kontra Nahrungsmittel

2 May, 2009, 11.00–12.00, Turbinenplatz Zürich

Eine öffentliche Diskussion mit Experten über die Möglichkeiten und Grenzen des 'grünen Benzins', organisiert von der Schweizerischen Akademie der Technischen Wissenschaften SATW.

Analyze that! – Analytical Chemistry Symposium

13 May 2009, ETH Zürich

Following the footsteps of CEAC, this symposium aims to bring together researchers in the field of analytical chemistry in order to discuss their latest scientific results. The symposium will take place in the new HIT (E51) building at ETH Zurich, Hoenggerberg.

Patenting in Life Science – A Course for PhD Students

4–5 June, 2009, Les Diablerets

The two-day course with workshops will give an introductory overview of various aspects of patenting in life sciences. It will thus close a gap in the curricula of students in this field. Lectures will include patent basics, issues concerning patenting in an academic research lab such as publishing and/or patenting, patenting challenges in a spin off company and ethical considerations in patenting.

VIII European Symposium of The Protein Society

14–18 June, 2009, Kongresshaus Zurich

A special highlight of the symposium will be the celebration of the 50th anniversary of the determination of the first high resolution structure ever of a protein – myoglobin – one of the foundations of modern protein science. The scientists involved in this scientific breakthrough in the summer of 1959 will give presentations at the meeting.

POSTDOCTORAL RESEARCH OPPORTUNITIES**Foreign Postdoctoral Research Program**

RIKEN, founded in 1917, is the only comprehensive natural sciences research institute in Japan. The institute conducts world-leading research in many fields of the natural sciences, including physics, chemistry, biology, medicine and engineering.

RIKEN is now accepting applications for the FY 2010 Foreign Postdoctoral Researcher Program. This program is for young scientists who have demonstrated creative and innovative ideas.

Salary: 487,000 yen/month
Research budget: 1 million yen/year (allocated to the host lab)
Benefits package: relocation allowance, housing allowance, etc.

For more information, visit the website www.riken.jp and follow the career opportunities link.
