Basel fusion point of the pharmaceutical and chemical industry

ILMAC covers the entire Swiss market, and the Basel Exhibition Center is the perfect location for the Swiss pharmaceutical and chemical industry.

As a user-oriented trade fair, the event is aimed at specialists from over 20 different branches of industry in the pharmaceutical, chemical, biotechnological, food, beverage, cosmetics, and other sectors. Despite the variety, ILMAC is extremely manageable and can be visited in one day.

Since 1959

ILMAC – the International trade fair and conference for Laboratory, Measurement technology and Automation in the Chemical industry – has been the only Swiss industry trade fair for chemicals and life sciences since 1959. The fair presents all industrial applications of process and laboratory technology.

ILMAC Conference

The scientific presentations at the ILMAC Conference show visions of the future development of laboratories and production processes in the chemical and pharmaceutical industry and offer insights into new concepts and innovative approaches.
