BACHEM: Your partner in TIDES

Bachem is a leading company specializing in the development and manufacture of peptides and oligonucleotides (TIDES), serving the pharmaceutical, biotechnology, diagnostics, cosmetics, and life science research industries. With more than 50 years of experience, Bachem combines deep scientific expertise, cutting-edge technology, and a commitment to operational excellence to deliver high-quality products and services. Our international presence, with headquarters in Switzerland and sites in Europe, the US, and Asia, enables us to support customers worldwide. Bachem is recognized for its focus on innovation, sustainability, and long-term partnerships, helping to bring life-changing therapies to patients efficiently and reliably.

We provide products for research, clinical development and commercial application to support customers from academia, pharmaceutical and biotechnology companies worldwide.

Research & Specialties: Our comprehensive portfolio includes catalog products and custom synthesis services for academic institutions, diagnostic developers, and specialty innovators. Bachem supports researchers worldwide with high-quality amino acid derivatives and peptides, available as catalog products for use in academic, biological, and medical research. For unique scientific needs across research, development, and production, we offer flexible custom synthesis, from simple peptides to complex molecules, with tailored analytics and rapid turnaround options. Additionally, innovators in cosmetics and diagnostics benefit from our sustainable peptide manufacturing and ISO 13485-certified production for high-quality peptides used in medical devices and in vitro diagnostics. From early development to market launch, our customers are supported every step of the way.

CMC Development: Bachem offers integrated services to support peptide and oligonucleotide drug development from early research through to commercial supply. Our Chemistry, Manufacturing, and Control (CMC) development approach streamlines clinical and regulatory progress, reduces risk, and accelerates timelines for our customers. We provide access to both research-grade and GMP-grade peptides, including complex peptides and synthetic proteins, with comprehensive analytical support across all development phases to ensure quality, compliance, and market readiness.

Expanding our expertise to oligonucleotides, we apply our long-standing chemical know-how to deliver high-quality APIs. Our services include process development, scale-up, analytical method development, stability studies, and regulatory documentation, all tailored to meet global standards. We aim to build long-term partnerships that help bring life-changing therapies to market.

Commercial API: Pharmaceutical companies rely on Bachem for large-scale manufacturing of peptide and oligonucleotide APIs at cGMP facilities in Europe and the US, inspected by the FDA and national authorities. We support both patent-protected and generic medicines, with production volumes reaching hundreds of kilograms or tons annually. Our tailored technical and regulatory support, including over 80 submitted Drug Master Files (DMFs) worldwide, helps streamline global regulatory submissions such as INDs, NDAs, and ANDAs. Nearly one-third of all commercial peptide APIs and several oligonucleotide APIs available today are manufactured by Bachem, reflecting our reliability, quality, and long-term partnerships with customers. Our capabilities also enable the supply of synthetic peptides as generics, ensuring an attractive long-term supply for our partners.

Bachem's commitment to **innovation** and **sustainability** sets us apart in the field of peptide and oligonucleotide manufacturing. By continuously advancing production technologies and embracing green chemistry, we minimize environmental impact while maintaining the highest standards of quality. Our dedication to responsible business practices and scientific progress empowers us to support our partners in bringing life-changing therapies to market efficiently and sustainably. With a culture built on excellence and long-term vision, Bachem is proud to help shape a healthier, more sustainable world for generations to come.
